

BBOP Orientation Workshop

An Orientation Workshop for the research study titled Biologically-based Outcome Predictors in Juvenile Idiopathic Arthritis (the BBOP study) was held in Saskatoon June 20-23, 2007.

The Orientation Workshop provided an introduction to the BBOP study. Through a series of presentations and interactions with mock patients, investigators and study coordinators became familiar with the study protocols.

This meeting was generously supported by the Canadian Institutes of Health Research, The Arthritis Society, The Canadian Arthritis Network and the Institute of Child and Arthritis Research, University of Saskatchewan.
